

## Manx RG Recapture & Recovery History 2010

Ring Number	Age Type	Capture	Date	Details
<b>Manx Shearwater</b>				
EW81711	N 4		20/08/10	The Chasms, Isle of Man
	X 0	Dead	05/09/10	Gansey, Isle of Man (2 km, NNE, 16 days)

This Manx Shearwater had been handed to a vet having been found in a garden following a very stormy night. It was checked over and released later that day nearby at The Chasms but unfortunately found washed ashore near Gansey 16 days later.

### **Storm Petrel**

2526390	N 4		14/08/08	St. Michael's Island, Isle of Man
	C 4	Recaptured	08/07/10	Port Vasgo, <b>Highland</b> (496 km, N, 1 yr 328days)
2526397	N 4		14/08/08	St. Michael's Island, Isle of Man
	C 4	Recaptured	18/07/10	Sanda Island, Kintyre, <b>Argyll and Bute</b> (148 km, NNW, 1 yr 338 days)
2630513	N 4		11/08/07	Craig Stirling, <b>Aberdeenshire</b>
	C 4	Recaptured	21/07/10	St. Michael's Island, Isle of Man (362 km, SSW, 2 yrs 344days)
2639054	N 4		22/08/09	Sheepland Harbour, Ardglass, <b>Down</b>
	C 4	Recaptured	20/07/10	St. Michael's Island, Isle of Man (67 km, ESE, 332 days)
2651980	N 4		13/08/09	Sheepland Harbour, Ardglass, <b>Down</b>
	C 4	Recaptured	03/08/10	St. Michael's Island, Isle of Man (67 km, ESE, 355 days)

The movements involving Highland and Aberdeenshire are noteworthy for us, but otherwise a fairly normal collection of movements.

### **Cormorant**

5255508	N 1		15/06/09	Stack Mooar, Isle of Man
	X 0	Dead	05/03/10	Halton, near Lancaster, <b>Lancashire</b> (104 km, ESE, 263 days)
5255519	N 1		15/06/09	Stack Mooar, Isle of Man
	X 0	Long dead	15/10/10	A30, Tedburn St Mary, <b>Devon</b> (401 km, S, 1 yr 122 days)
5255563	N 1		17/06/10	Stack Mooar, Isle of Man
	X 3	Dead	20/08/10	Tyttenhanger Gravel Pits, <b>Hertfordshire</b> (393 km, SE, 64 days)
5255591	N 1		17/06/10	Stack Mooar, Isle of Man
	X 0	Long dead	01/09/10	River Wyre Estuary, Knott-end-on-Sea, <b>Lancashire</b> (97 km, ESE, 76 days)

Two very interesting movements to Southern England. The bird found in Devon was reported as a road casualty on the busy A30! We have had a few birds to Hertfordshire previously. The birds found in Lancashire were more expected.

### **Shag**

1406314	N 1		26/07/10	Calf of Man, Isle of Man
	X 3	Dead	26/09/10	Ramsey, Isle of Man (42 km, NE, 62 days)

A typical local recovery for one of this year's young from the colony on the Calf of Man.

Ring Number	Age	Capture Type	Date	Details
<b>Little Egret</b>				
GC55852	N	1	13/05/10	near North Somercotes, Louth, <b>Lincolnshire</b>
	S	3 Sighted	25/07/10	Ardmore, Clyde Estuary, <b>Argyll and Bute</b> (419 km, NW, 73 days)
	S	3 Sighted	27/07/10	Ardmore, Clyde Estuary, <b>Argyll and Bute</b> (419 km, NW, 75 days)
	S	3 Sighted	03/08/10	Belhaven Bay, Dunbar, <b>East Lothian</b> (333 km, NNW, 82 days)
	S	3 Sighted	04/08/10	Belhaven Bay, Dunbar, <b>East Lothian</b> (333 km, NNW, 83 days)
	S	3 Sighted	08/08/10	Belhaven Bay, Dunbar, <b>East Lothian</b> (333 km, NNW, 87 days)
	S	3 Sighted	07/09/10	Langness, Isle of Man (321 km, WNW, 117 days)
	S	3 Sighted	19/09/10	Campfield Marsh, <b>Cumbria</b> (277 km, NW, 129 days)
	S	3 Sighted	20/09/10	Port Carlisle, <b>Cumbria</b> (274 km, NW, 130 days)

This is a remarkable set of sightings of this colour ringed Little Egret. It moved quickly North West from its natal site in Lincolnshire to the Clyde Estuary on the West coast of Scotland. It then moved over to the East coast of Scotland to Dunbar before heading South West to Langness here on the Isle of Man and quickly double backed, last seen on the Solway coast in Cumbria.

### Mute Swan

The colour ringing of the Manx population of Mute Swans was restarted late in 2010 and these are the first results from the few birds we have already caught.

U3465	N	3	01/09/93	Ramsey, Isle of Man
	S	4 Sighted	29/05/94	Newtownabbey, <b>Antrim</b> (107 km, WNW, 270 days)
	S	4 Sighted	13/10/94	Cliftonville, <b>Belfast</b> (108 km, WNW, 1 yr 42 days)
	O	4 Sighted	30/10/94	Ramsey, Isle of Man (1 yr 59 days)
	O	4 Sighted	22/07/95	Ramsey, Isle of Man (1 yr 324 days)
	O	4 Sighted	06/01/96	Ramsey, Isle of Man (2 yrs 127 days)
	R	6 Recaptured	16/08/96	Ramsey, Isle of Man (2 yrs 350 days)
	R	8M Recaptured	06/06/08	Ronague, Isle of Man (30 km, SW, 14 yrs 279 days)
	R	6M Recaptured	25/10/10	Ramsey, Isle of Man (17 yrs 54 days)
	R	6M Recaptured	21/12/10	Ramsey, Isle of Man (17 yrs 111 days)

A bird hatched in 1993 (a cygnet from the pair that nested in Derbyhaven that year) which moved to Northern Ireland sometime that Winter before being seen back in Ramsey the following Autumn. It was found nesting in Ronague in 2008 (the original colour ring missing by then) and then recaptured in Ramsey in the Autumn of 2010. We should hopefully be able to identify if it is still nesting in Ronague in future years now that it has been colour ringed again.

Ring Number	Age	Capture Type	Date	Details
U7291	N	6	21/02/98	Silverdale Glen, Isle of Man
	O	6 Sighted	02/05/98	Strandhall, Isle of Man (4 km, WSW, 70 days)
	O	6 Sighted	24/05/98	Castletown, Isle of Man (4 km, S, 92 days)
	O	6 Sighted	24/02/99	Port St Mary, Isle of Man (7 km, SW, 1 yr 3 days)
	O	6 Sighted	13/04/99	Castletown, Isle of Man (4 km, S, 1 yr 51 days)
	O	6 Sighted	15/09/99	Castletown, Isle of Man (4 km, S, 1 yr 206 days)
	O	6 Sighted	19/06/00	Castletown, Isle of Man (4 km, S, 2 yrs 119 days)
	O	6 Sighted	14/11/01	Ramsey, Isle of Man (30 km, NE, 3 yrs 26 6days)
	O	6 Sighted	20/04/02	Billown, Isle of Man (2 km, SSW, 4 yrs 58 days)
	O	6 Sighted	20/05/02	Billown, Isle of Man (2 km, SSW, 4 yrs 88 days)
	O	6 Sighted	14/11/03	Ramsey, Isle of Man (30 km, NE, 5 yrs 266 days)
	O	6 Sighted	10/12/03	Ramsey, Isle of Man (30 km, NE, 5 yrs 29 2days)
	O	6 Sighted	02/01/04	Ramsey, Isle of Man (30 km, NE, 5 yrs 315 days)
	O	6 Sighted	24/09/04	Ramsey, Isle of Man (30 km, NE, 6 yrs 216 days)
	O	6 Sighted	06/11/04	Ramsey, Isle of Man (30 km, NE, 6 yrs 259 days)
	R	6 Recaptured	21/10/10	Ramsey, Isle of Man (30 km, NE, 12 yrs 242 days)
	R	6 Recaptured	22/10/10	Ramsey, Isle of Man (30 km, NE, 12 yrs 242 days)
	O	6 Sighted	21/12/10	Ramsey, Isle of Man (30 km, NE, 12 yrs 303 days)

U7291 has apparently not strayed from the Island in its 12 year life to date. Now that it has been colour ringed again (it had lost its original colour ring sometime after 2004) we will hopefully identify if it is one of the local breeding birds.

X2284	N	8	13/04/06	Billown, Isle of Man
	O	8 Sighted	23/01/07	Ramsey, Isle of Man (32 km, NE, 285 days)
	O	6 Sighted	11/09/10	Ramsey, Isle of Man (32 km, NE, 4 yrs 151 days)
	O	6 Sighted	21/12/10	Ramsey, Isle of Man (32 km, NE, 4 yrs 252 days)
X2285	N	8F	08/06/06	Eary, Foxdale, Isle of Man
	O	8 Sighted	23/01/07	Ramsey, Isle of Man (25 km, NE, 229 days)
	O	8F Sighted	17/01/08	St. Lonan's Church, Isle of Man (14 km, ENE, 1 yr 223 days)
	O	6 Sighted	06/10/10	Laxey Head, Isle of Man (16 km, ENE, 4 yrs 120 days)
Z83917	N	6M	22/10/10	Ramsey, Isle of Man
	O	6 Sighted	21/12/10	Ramsey, Isle of Man (60 days)
ZZ7452	N	5F	04/10/08	Whitehaven Dock, <b>Cumbria</b>
	C	6F Recaptured	21/10/10	Ramsey, Isle of Man (56 km, WSW, 2 yrs 17 days)

A superb result from the first days Swan catching in Ramsey was finding this 'foreigner' amongst the herd! It will be interesting to track the movements of ZZ7452 now that it has been colour ringed.

Ring Number	Age	Capture Type	Date	Details	
<b>Whooper Swan</b>					
ISR.A8399	N	6M	05/08/08	Vatnashlid, Skagafjordur, <b>ICELAND</b>

	S	8M	Satellite	07/04/10	Hvitarvatn, <b>ICELAND</b> (1541 km, NW, 3 yrs 51 days)

The two Icelandic caught birds (ISR.A8399 & ISR.A8676) were both records from colour ring sightings. The other two birds were located by satellite tracking of special tags placed on them to record their migration routes. This was part of a study to identify Swan migration routes to assist in offshore wind farm planning in the North Atlantic area.

ZZ6079 had actually stayed in Northern Ireland in the summer of 2009 rather than fly to Iceland to breed. However when returning birds joined it that Autumn it stayed with them and returned to Martin Mere, Lancashire before setting off on a more usual migration back to Iceland. Unfortunately the satellite tag stopped transmitting whilst the bird was midway between the UK and Iceland so its fate is not known beyond that point.

	S	6 Sighted	04/04/10	Derbyhaven, Isle of Man (1523 km, SE, 5 yrs 322 days)

ISR.119808 is the returning colour ringed female 'Yellow J4', recorded for its 4<sup>th</sup> consecutive winter in the Langness/Derbyhaven area.

ISR.119693 & 'CL' were both seen at Derbyhaven in April by Pete Hadfield who noted their colour rings. All 3 birds are from the Irish Brent Goose study.

### Sparrowhawk

DK60775	N	3M	08/09/06	Calf of Man, Isle of Man
	X	0 Long dead	19/04/10	Ballachurry, Isle of Man (39 km, NE, 3 yrs 223 days)
EW81565	N	1	02/07/09	Site confidential, Northern Isle of Man
	X	0 Dead	01/02/10	Garey, Isle of Man, (214 days)
EW81567	N	1	02/07/09	Site confidential, Northern Isle of Man
	C	4F Recaptured	24/10/10	Port Lewaigue, Isle of Man, (1 yr 114 days)

EW81565 & EW81567 were from the same brood ringed in 2009. Sean recaptured EW81567 at Port Lewaigue but unfortunately its sibling was found dead at The Garey having flown into a window. DK60775, which had been ringed as a first year Male on the Calf of Man, was found long dead in a field near Ballachurry (near St Judes).

FH03009	N 1		06/07/10	near Rue Point, Isle of Man
	R 3	Recaptured	07/08/10	near Rue Point, Isle of Man (32 days)
FP01502	N 8		19/09/98	Llanfairfechan, <b>Conwy</b>
	C 8	Recaptured	16/06/10	Derbyhaven, Isle of Man (101 km, NNW, 11 yrs 270 days)

FP01502 was nesting at Derbyhaven when caught. It is the first time a Welsh ringed Oystercatcher has been caught here. The pair went on to raise 2 chicks which were also ringed.

FH03009 was originally ringed as a young chick and then re-caught as a fully grown, fledged juvenile a month later.

### Ringed Plover

NW01172	N 3		08/09/10	Rue Point, Point of Ayre, Isle of Man
	R 3	Recaptured	09/09/10	Rue Point, Point of Ayre, Isle of Man (1 day)
NW10408	N 1		21/07/10	Rue Point, Point of Ayre, Isle of Man
	R 3	Recaptured	09/08/10	Rue Point, Point of Ayre, Isle of Man (19 days)

NW01408 was originally ringed when it was no more than 2 days old and then re-caught 19 days later as a fully grown juvenile. Both this bird and the Oystercatcher FH03009 above were in good body mass and muscle condition when recaptured helping to show that the Ayres are an excellent habitat with plenty of food for growing wader chicks.

### Sanderling

GHL.B0386	N 2		23/10/09	Asenko Village, <b>GHANA, AFRICA</b>
	S 4	Sighted	28/05/10	The Ayres, Ballaghennie, Isle of Man (5501 km, N, 217 days)

This was undoubtedly the recovery of the year! A field sighting of colour rings and a leg flag on this Sanderling by Pete Giovannini during his visit to the Isle of Man in May. The bird is part of a study on Sanderlings by the International Wader Study Group. Sanderling winter on the coast of West Africa and are a circumpolar Arctic breeder. When seen on the Island in May it was on its Nothward migration to its breeding grounds.

### Dunlin

NT70759	N 3		07/08/10	near Rue Point, Isle of Man
	R 3	Recaptured	09/08/10	Rue Point, Point of Ayre, Isle of Man (2 km, E, 2 days)

### Herring Gull

GA35605	N 1		17/06/01	Calf of Man, Isle of Man

	O	10	Sighted	03/11/10	Port St Mary Bay, Isle of Man (105 days)
GP09916	N	10		13/08/94	Ramsey, Isle of Man
	R	10	Recaptured	12/06/10	Port e Vullen, Isle of Man (3 km, SE, 15 yrs 303 days)
GR21752	N	10		22/07/10	Port e Vullen, Isle of Man
	O	10	Sighted	28/07/10	The Hibernian, Isle of Man (3 km, SW, 6 days)
GR21770	N	3		14/11/10	Peel Bay, Peel, Isle of Man
	O	3	Sighted	26/11/10	Peel Bay, Peel, Isle of Man (12 days)
GR21781	N	10		18/12/10	Ramsey, Isle of Man
	O	10	Sighted	20/12/10	Ramsey, Isle of Man (2 days)

A colour ringing project was commenced on Herring Gull this year by the Manx RG and these are the first few results from that work. Note the age of GP09916, re-caught just under 16 years after it was first ringed in Ramsey. Also GA35605 which had been ringed as a chick on the Calf of Man in 2001 and re-caught by Manx RG on a boat to the North of the Calf just over 9 years later in July this year.

### Sand Martin

L159213	N	4F		05/06/10	Carey's Sand Pit, Ballycon, Offaly, <b>EIRE</b>
	C	4F	Recaptured	29/07/10	Point of Ayre, Isle of Man (222 km, NE, 54 days)
	C	4F	Recaptured	08/08/10	Point of Ayre, Isle of Man (222 km, NE, 64 days)
X431111	N	4F		29/07/10	Point of Ayre, Isle of Man
	R	4F	Recaptured	08/08/10	Point of Ayre, Isle of Man (10 days)
X431116	N	4		29/07/10	Point of Ayre, Isle of Man
	R	4	Recaptured	08/08/10	Point of Ayre, Isle of Man (10 days)
X431136	N	4F		29/07/10	Point of Ayre, Isle of Man
	R	4F	Recaptured	08/08/10	Point of Ayre, Isle of Man (10 days)

L159213 is a very interesting, mid-summer movement from one colony to another. It was identified as a breeding Female when originally caught in Offaly, Eire and when caught at one of the colonies near the Point of Ayre it was confirmed as breeding there also. Sand Martins are multi-brood nesters but it is interesting to note the movement between the colonies between nesting attempts.

Ring Number	Age Type	Capture	Date	Details
<b>Rock Pipit</b>				
2589303	N	3	03/08/10	Port Mooar, near Maughold, Isle of Man
	R	3 Recaptured	10/12/10	Port Mooar, near Maughold, Isle of Man (129 days)

	R	3 Recaptured	28/09/10	Port Mooar, near Maughold, Isle of Man (51 days)
2589335	N	3	06/10/10	Port Mooar, near Maughold, Isle of Man
	R	3 Recaptured	04/11/10	Port Mooar, near Maughold, Isle of Man (29 days)
2621832	N	3	01/11/10	Fenella bay, Peel, Isle of Man
	R	3 Recaptured	26/11/10	Fenella bay, Peel, Isle of Man (25 days)

A colour ringing project was commenced on Rock Pipits here on the Island this year. We aim to identify winter site fidelity and juvenile dispersal in the local population and winter site fidelity in the apparent migrant population that occur in the Autumn & Winter.

### Duncock

V329383	N	6M	30/04/10	Port Lewaigue, Isle of Man
	R	6M Recaptured	23/06/10	Port Lewaigue, Isle of Man (54 days)

### Robin

X431221	N	3	12/09/10	Kerrowmoar, Isle of Man
	R	3 Recaptured	17/10/10	Kerrowmoar, Isle of Man (35 days)

### Blackbird

CF10092	N	4F	19/09/09	Croit-e-Caley, Colby, Isle of Man
	R	6F Recaptured	03/02/10	Croit-e-Caley, Colby, Isle of Man (137 days)
CL71060	N	3J	03/06/06	near Dog Mills, Isle of Man
	R	4M Recaptured	01/08/10	near Dog Mills, Isle of Man (4 yrs 59 days)

CL71060 is a reasonable age for a Blackbird. When first caught in 2006 it was a recently fledged young bird but it has obviously found the Dog Mills to its liking as it appeared to be a breeding adult male when re-caught this year, now over 4 years old.

### Blackcap

L038196	N	3F	07/08/10	Kerrowmoar, Isle of Man
	R	3F Recaptured	25/08/10	Kerrowmoar, Isle of Man (18 days)
V078987	N	3JM	03/08/10	Curragh Beg, nr Dog Mills, Isle of Man
	R	3JM Recaptured	05/08/10	Curragh Beg, nr Dog Mills, Isle of Man (2 days)

Ring Number	Age Type	Capture	Date	Details
-------------	----------	---------	------	---------

### Willow Warbler

BRE016	N	4	22/04/10	Port Lewaigue, Isle of Man
	R	4	Recaptured 13/07/10	Port Lewaigue, Isle of Man (82 days)

A bird that had nested in the area as shown by its brood patch when caught in July.

### Goldcrest

BEL483	N	3F	12/10/10	Calf of Man, Isle of Man
	C	3F	Recaptured 15/11/10	Tholt-e-Will Plantation, Isle of Man (32 km, NE, 34 days)

An interesting movement from the Calf of Man to the inland site of Tholt-e-Will Plantation. The timing of its capture on the Calf of Man coincided with a large arrival of migrant Goldcrests from Fenno-Scandinavia into the British Isles.

### Long-tailed Tit

ACJ875	N	2	11/12/08	Croit-e-Caley, Colby, Isle of Man
	R	2	Recaptured 31/12/08	Croit-e-Caley, Colby, Isle of Man (20 days)
	R	4	Recaptured 02/02/10	Croit-e-Caley, Colby, Isle of Man (1 yr 53days)

ACJ875 is from the local flock of Long-tailed Tits that visit my Croit-e-Caley garden feeding station from mid-summer till early spring when they disperse to breed.

### Coal Tit

	R 5	Recaptured	02/02/10	Croit-e-Caley, Colby, Isle of Man (118 days)

A typical selection of Blue Tit retraps/recoveries although surprisingly none were reported dead from either cats or window strikes this year (the most common causes of death reported for Blue tits). L214364 & V329423 both moved between Sean's site at Maughold and the Calf, a good distance for Blue Tits, which rarely move far. It is interesting to note that V329423 was ringed as a chick in a nest box in Sean's garden which lends credence to the theory that the Autumn influx of Blue & Great Tits on the Calf of Man each Autumn are local juveniles roaming the Isle of Man looking for new territories.

Note also the 2 birds (V078695 & V329111) over 3 years old, a good age for a Blue Tit.

### Great Tit
